Ivan Lazunin | ML Engineer

✉ code.wibbn@gmail.com   ⌗ wibbn   ▢ +7 (900) 475-84-92

A second-year student interested in Deep Learning, Computer Vision and any other suggestions.
Looking for an internship with a team, which proposes some challenging problems in research and
development.

EDUCATION

MIREA - Russian Technological University   **Moscow, Russia**
Bachelor in Applied Mathematics (Data Analysis)   *Sept 2019 - June 2023*

PROJECTS

Single Image Reflection Separation ⌗   **Sirius, Sochi**
Yandex & HSE   *Nov 2019*
Investigated methods of reflection removal during Yandex intensive that specialized in analysing state-of-the-art articles and reproducing their results.

Assessing Humor in Edited News Headlines ⌗   **Sirius, Sochi**
Yandex & Sirius   *Apr 2021*
Solving the NLP problem of the humor assessment competition. Analysis and reproduction of state-of-the-art articles at the Yandex project intensive.

ACHIVEMENTS

International Engineering Championship «Case-In» ⌗   **1st place**
The predictive maintenance problem, team competition «Digital Atom»   *Sep 2020*

Predicting the outcome of a match in «Dota2»   **final round**
Academy of Artificial Intelligence of Sberbank   *Mar 2018, Mar 2019*

NTI Contest: Big Data track   **final round**
The annual high school student team tech competition   *Feb 2018*

Russian Computer Science competition   **2nd place**
School competition, regional round   *Feb 2018*

ADDITIONAL EDUCATION

Winter school programming in MIPT   *Jan 2019*
Summer school programming in MIPT   *Aug 2018*

SKILLS

Programming Languages	Python, JavaScript, TypeScript, C++, Java
Applications	git, bash, docker, LaTeX
Libraries	Pytorch, Pytorch Lightning, Numpy, Pandas, Matplotlib, OpenCV
Languages	Russian (native), English (pre-intermediate)
Hobbies	graduated from Music School, travelling, photography, computer graphics
